INDEX TO SUBJECTS

A

Acid, amino, dicarboxylic, influx across rabbit ileum brush border, effects of amino acid charge on sodium–amino acid interaction, 621
—, amino, transport system in rabbit ileum mucosal border, characteristics, 673
—, gamma aminobutyric, receptors, desensitization in muscle fibers of crab, *Cancer borealis*, 33
—, polycytidylic, control of interferon production in rabbit cells treated with, 97 s
Acids, amino, effects on labellar hair chemosensory cells of fly, 768
Acyl phosphatases, membrane, leukocidin, and tetraethylammonium ions in relation to leukocyte potassium pump, 16
Adenosine-5′-diphosphate and orthophosphate, intracellular, effects on sensitivity of sodium efflux from squid axon to external sodium and potassium, 583
Alanine-sodium interaction in rabbit ileum, effects of monovalent cations on, implication of anionic groups in sodium binding, 462
Albumin, serum, bovine, contribution of excluded volume for solute molecules to apparent nonsolvent water, 180
Amino acid, dicarboxylic, influx across rabbit ileum brush border, effects of amino acid charge on sodium–amino acid interaction, 621
— acid transport system in rabbit ileum mucosal border, characteristics, 673
— acids, effects on labellar hair chemosensory cells of fly, 768
γ-Aminobutyric acid receptors in muscle fibers of crab, *Cancer borealis*, desensitization, 33
Amphotericin B and nystatin, polyene antibiotics, ion permeability induced in thin lipid membranes by, 100
— B and nystatin, polyene antibiotics, water and nonelectrolyte permeability induced in thin lipid membranes by, 125
Animal genotype, influence, and origin and nature of cells involved in circulating interferon production in mouse, 43 s
Antibiotics, polyene, nystatin and amphotericin B, ion permeability induced in thin lipid membranes by, 100
—, polyene, nystatin and amphotericin B, water and nonelectrolyte permeability induced in thin lipid membranes by, 125
Aplysia neurons, increased chloride conductance as proximate cause of hydrogen ion concentration effects in, 559
— neurons, mechanism of excitation by carbon dioxide, 543
Axon, squid, sodium efflux to external sodium and potassium, effects of intracellular adenosine-5′-diphosphate and orthophosphate on sensitivity of, 583

B

Barnacle, giant, muscle fiber, solvent water for electrolytes in, 521
Bladder, urinary, toad, hydroosmotic response, synergists and antagonists of, threshold and receptor reserve in action of neurohypophyseal peptides, 250
Blood cell, red. *See* Erythrocyte.
— cells, red. *See* Erythrocytes.
Bovine serum albumin, contribution of excluded volume for solute molecules to apparent nonsolvent water, 180
Butyric acid, gamma amino-, receptors in muscle fibers of crab, *Cancer borealis*, desensitization, 33

C

Calcium effect on time course of carbamylcholine action at neuromuscular junction, 407
— ions, dissociated, control of contractility in *Spirostomum* by, 168
Cancer borealis, muscle fibers, desensitization of gamma aminobutyric acid receptors in, 33
Carbamylcholine action on neuromuscular junction, calcium effect on time course of action of, 407

Carbon dioxide, mechanism of excitation of *Aplysia* neurons by, 543
Cardiac isotonic contractions, energy production in, 732
— tissue, mammalian, kinetic studies of specific uncoupling of excitation and contraction by lanthanum in, 191
Cell, blood, red. *See* Erythrocyte.
—, intracellular adenosine-5′-diphosphate and orthophosphate, effects on sensitivity of sodium efflux from squid axon to external sodium and potassium, 583
—, L-, interferon, virus-induced, comparison of in vitro and in vivo labeling, 134 s
Cells, blood, red. *See* Erythrocytes.
—, chemosensory, fly, labellar hair, effects of amino acids on, 768
— involved in circulating interferon production in mouse, origin and nature, and influence of animal genotype, 43 s
—, kidney, rabbit, cultured, electron microscopic study of uptake of labeled double-stranded polynucleotide by, 99 s
—, rabbit, treated with polycytidylic acid, control of interferon production in, 97 s
Cellular inhomogeneity in dog red cells as revealed by sodium flux, 438
— mechanisms of interferon production, 76 s
— transport of magnesium in rat liver, 716
Chemical aspects, physico-, and purification of interferons, 113 s
Chemosensory cells, fly, labellar hair, effects of amino acids on, 768
Chloride conductance, increased, as proximate cause of hydrogen ion concentration effects in *Aplysia* neurons, 559
Chromatographic model of olfaction, evidence for, 46
Cold periods, effects on stimulus-response system of *Phycomyces*, 297
Color-coded S-potentials, dynamic characteristics, 1
Conductance, chloride, increased, as proximate cause of hydrogen ion concentration effects in *Aplysia* neurons, 559
Conductances, membrane, and spectral sensitivities of *Pecten* photoreceptors, 392
Contractility in *Spirostomum*, control by dissociated calcium ions, 168
Contraction and excitation in mammalian cardiac tissue, specific uncoupling by lanthanum, kinetic studies, 191
Contractions, cardiac isotonic, energy production in, 732
Crab, *Cancer borealis*, muscle fibers, desensitization of gamma aminobutyric acid receptors in, 33
Cytidylic acid, poly-, control of interferon production in rabbit cells treated with, 97 s

D

Desensitization of gamma aminobutyric acid receptors in muscle fibers of crab, *Cancer borealis*, 33
Dicarboxylic amino acid influx across rabbit ileum brush border, effects of amino acid charge on sodium–amino acid interaction, 621
Disease, viral, ocular, and interferon, 249 s

E

Electrolyte, non-, and water permeability induced in thin lipid membranes by polyene antibiotics, nystatin and amphotericin B, 125
Electrolytes, solvent water in giant barnacle muscle fiber for, 521
Electron microscopic study of uptake of labeled double-stranded polynucleotide by cultured rabbit kidney cells, 99 s
Energy production in cardiac isotonic contractions, 732
Erythrocyte, human, sodium movements in, 322
Erythrocytes, dog, cellular inhomogeneity as revealed by sodium flux, 438
Excitation and contraction in mammalian cardiac tissue, specific uncoupling by lanthanum, kinetic studies, 191
— and inhibition in *Limulus* eye, quantitative description of dynamics of, 421
— of *Aplysia* neurons by carbon dioxide, mechanism, 543
Eye, *Limulus*, quantitative description of dynamics of excitation and inhibition in, 421
— of scallop, *Pecten irradians*, photoreceptor potentials of opposite polarity in, 376

F

Fiber, muscle, giant barnacle, solvent water for electrolytes in, 521
Fibers, muscle, of crab, *Cancer borealis*, desensitization of gamma aminobutyric acid receptors in, 33
—, muscle, skeletal, linear electrical properties of transverse tubules and surface membrane of, 640

Fly, effects of amino acids on labellar hair chemosensory cells of, 768
Flytrap, Venus's, response properties of sensory hair excised from, 64
Frog sartorius muscles treated with glycerol, potassium exchange and afterpotentials in, 692
— skeletal muscle, factors in inactivation of postjunctional membrane receptors of, 218
— skin, outer surface, direct measurement of sodium uptake at, 83

G

Genotype, animal, influence, and origin and nature of cells involved in circulating interferon production in mouse, 43 s
Gills, irrigated, of rainbow trout, *Salmo gairdneri*, mechanisms of sodium ion transport by, 342
Glycerol, potassium exchange and afterpotentials in frog sartorius muscles treated with, 692

H

Hair, labellar, chemosensory cells, fly, effects of amino acids on, 768
—, sensory, excised from Venus's flytrap, response properties, 64
Hydrogen ion concentration effects in *Aplysia* neurons, increased chloride conductance as proximate cause of, 559
Hydroosmotic response of toad urinary bladder, synergists and antagonists of, threshold and receptor reserve in action of neurohypophyseal peptides, 250

I

Ileum, rabbit, dicarboxylic amino acid influx across brush border, effects of amino acid charge on sodium–amino acid interaction, 621
—, rabbit, effects of monovalent cations on sodium-alanine interaction in, implication of anionic groups in sodium binding, 462
—, rabbit, mucosal border, characteristics of amino acid transport system in, 673
Immunity and interferon, interrelationships during viral infections, 212 s
Infections, protozoal, interferon and interferon inducers in, 227 s
—, viral, interrelationships of interferon and immunity during, 212 s
Inhibition and excitation in *Limulus* eye, quantitative description of dynamics of, 421
Interferon action, mechanism, 149 s
—, development of antiviral state in response to, 172 s
— and immunity, interrelationships during viral infections, 212 s
— inducers, double-stranded polynucleotides as, 90 s
— inducers, nonviral, 57 s
— induction by viruses, 3 s
— induction by viruses, molecular aspects, 13 s
— and interferon inducers in protozoal infections, 227 s
— and interferon inducers in treatment of malignancies, 238 s
—, L-cell, virus-induced, comparison of in vitro and in vivo labeling, 134 s
— and ocular viral disease, 249 s
— production by nonviral stimuli of microbial origin, 25 s
— production, cellular mechanisms, 76 s
— production, circulating, in mouse, origin and nature of cells involved and influence of animal genotype, 43 s
— production in rabbit cells treated with polycytidylic acid, control of, 97 s
— system, defensive role, 193 s
Interferons, purification and physicochemical aspects, 113 s

K

Kidney cells, rabbit, cultured, electron microscopic study of uptake of labeled double-stranded polynucleotide by, 99 s

L

Labeling, in vitro and in vivo, of virus-induced L-cell interferon, comparison, 134 s
Labellar hair chemosensory cells, fly, effects of amino acids on, 768
Lanthanum, kinetic studies of specific uncoupling of excitation and contraction in mammalian cardiac tissue by, 191
Leukocidin, tetraethylammonium ions, and membrane acyl phosphatases in relation to leukocyte potassium pump, 16
Leukocyte potassium pump, leukocidin, tetraethylammonium ions, and membrane acyl phosphatases in relation to, 16

Limulus eye, quantitative description of dynamics of excitation and inhibition in, 421
— photoreceptor, stochastic properties of discrete waves of, 751
Lipid membranes, thin, ion permeability induced in by polyene antibiotics, nystatin and amphotericin B, 100
— membranes, thin, water and nonelectrolyte permeability induced in by polyene antibiotics, nystatin and amphotericin B, 125
Liver, rat, cellular transport of magnesium in, 716

M

Magnesium in rat liver, cellular transport, 716
Malignancies, interferon and interferon inducers in treatment of, 238 s
Mammalian cardiac tissue, kinetic studies of specific uncoupling of excitation and contraction by lanthanum in, 191
Man, red blood cell, sodium movements in, 322
Membrane acyl phosphatases, leukocidin, and tetraethylammonium ions in relation to leukocyte potassium pump, 16
— conductances and spectral sensitivities of *Pecten* photoreceptors, 392
— receptors, postjunctional, of frog skeletal muscle, factors in inactivation of, 218
—, surface, and transverse tubules of skeletal muscle fibers, linear electrical properties, 640
Membranes, excitable, kinetics, voltage amplification in diffusion regime, 272
—, lipid, thin, ion permeability induced in by polyene antibiotics, nystatin and amphotericin B, 100
—, lipid, thin, water and nonelectrolyte permeability induced in by polyene antibiotics, nystatin and amphotericin B, 125
—, sarcoplasmic reticulum, permeability, 147
Microbial origin, interferon production by nonviral stimuli of, 25 s
Microscopic study, electron, of uptake of labeled double-stranded polynucleotide by cultured rabbit kidney cells, 99 s
Model of olfaction, chromatographic, evidence for, 46
Molecular aspects of interferon induction by viruses, 13 s
Molecules, solute, excluded volume of bovine serum albumin for, contribution to apparent nonsolvent water, 180
Mucosal border, rabbit ileum, characteristics of amino acid transport system in, 673
Muscle end plate receptors, influence of polyvalent cations on activation of, 309
— fiber, giant barnacle, solvent water for electrolytes in, 521
— fibers of crab, *Cancer borealis*, desensitization of gamma aminobutyric acid receptors in, 33
— fibers, skeletal, linear electrical properties of transverse tubules and surface membrane of, 640
—, skeletal, frog, factors in inactivation of postjunctional membrane receptors of, 218
Muscles, sartorius, frog, treated with glycerol, potassium exchange and afterpotentials in, 692
Myometrium, rat, characteristics of electrogenic sodium pumping in, 360

N

Neurohypophyseal peptides, threshold and receptor reserve in action of, synergists and antagonists of hydroosmotic response of toad urinary bladder, 250
Neuromuscular junction, calcium effect on time course of carbamylcholine action at, 407
Neurons, *Aplysia*, increased chloride conductance as proximate cause of hydrogen ion concentration effects in, 559
—, *Aplysia*, mechanism of excitation by carbon dioxide, 543
Nucleotide, poly-, double-stranded labeled, uptake by cultured rabbit kidney cells, electron microscopic study, 99 s
Nucleotides, poly-, double-stranded, as interferon inducers, 90 s
Nystatin and amphotericin B, polyene antibiotics, ion permeability induced in thin lipid membranes by, 100
— and amphotericin B, polyene antibiotics, water and nonelectrolyte permeability induced in thin lipid membranes by, 125

O

Ocular viral disease and interferon, 249 s
Olfaction, evidence for chromatographic model, 46

Orthophosphate and adenosine-5′-diphosphate, intracellular, effects on sensitivity of sodium efflux from squid axon to external sodium and potassium, 583

P

Pecten irradians eye, photoreceptor potentials of opposite polarity in, 376
— photoreceptors, membrane conductances and spectral sensitivities, 392
Peptides, neurohypophyseal, threshold and receptor reserve in action of, synergists and antagonists of hydroosmotic response of toad urinary bladder, 250
Permeability, ion, induced in thin lipid membranes by polyene antibiotics, nystatin and amphotericin B, 100
— of sarcoplasmic reticulum membranes, 147
—, water and nonelectrolyte, induced in thin lipid membranes by polyene antibiotics, nystatin and amphotericin B, 125
Phosphatases, acyl, membrane, leukocidin, and tetraethylammonium ions in relation to leukocyte potassium pump, 16
Photoreceptor, *Limulus*, stochastic properties of discrete waves of, 751
— potentials of opposite polarity in eye of scallop, *Pecten irradians*, 376
Photoreceptors, *Pecten*, membrane conductances and spectral sensitivities, 392
Phycomyces, effects of cold periods on stimulus-response system, 297
Physicochemical aspects and purification of interferons, 113 s
Polyene antibiotics, nystatin and amphotericin B, ion permeability induced in thin lipid membranes by, 100
— antibiotics, nystatin and amphotericin B, water and nonelectrolyte permeability induced in thin lipid membranes by, 125
Polynucleotide, double-stranded labeled, uptake by cultured rabbit kidney cells, electron microscopic study, 99 s
Polynucleotides, double-stranded, as interferon inducers, 90 s
Potassium exchange and afterpotentials in frog sartorius muscles treated with glycerol, 692
— pump, leukocyte, leukocidin, tetraethylammonium ions, and membrane acyl phosphatases in relation to, 16
— and sodium, external, effects of intracellular adenosine-5′-diphosphate and orthophosphate on sensitivity of sodium efflux from squid axon to, 583
Protozoal infections, interferon and interferon inducers in, 227 s
Pump, potassium, leukocyte, leukocidin, tetraethylammonium ions, and membrane acyl phosphatases in relation to, 16
Pumping, sodium, electrogenic, in rat myometrium, characteristics, 360
Purification and physicochemical aspects of interferons, 113 s

R

Reticulum membranes, sarcoplasmic, permeability, 147
Retina, skate, visual adaptation in, 491

S

Salmo gairdneri, mechanisms of sodium ion transport by irrigated gills of, 342
Sarcoplasmic reticulum membranes, permeability, 147
Sartorius muscles, frog, treated with glycerol, potassium exchange and afterpotentials in, 692
Scallop, *Pecten irradians*, eye, photoreceptor potentials of opposite polarity in, 376
Sensitivities, spectral, and membrane conductances of *Pecten* photoreceptors, 392
Sensitivity of sodium efflux from squid axon to external sodium and potassium, effects of intracellular adenosine-5′-diphosphate and orthophosphate on, 583
Sensory hair excised from Venus's flytrap, response properties, 64
Serum albumin, bovine, contribution of excluded volume for solute molecules to apparent nonsolvent water, 180
Skate retina, visual adaptation in, 491
Skeletal muscle fibers, linear electrical properties of transverse tubules and surface membrane of, 640
— muscle, frog, factors in inactivation of postjunctional membrane receptors of, 218
Skin, frog, outer surface, direct measurement of sodium uptake at, 83
Sodium-alanine interaction in rabbit ileum, effects of monovalent cations on, implication of anionic groups in sodium binding, 462
Sodium–amino acid interaction, effects of amino acid charge, dicarboxylic amino acid influx across rabbit ileum brush border, 621

Sodium efflux from squid axon to external sodium and potassium, effects of intracellular adenosine-5′-diphosphate and orthophosphate on sensitivity of, 583
— flux, cellular inhomogeneity in dog red cells as revealed by, 438
— ion transport by irrigated gills of rainbow trout, *Salmo gairdneri*, mechanisms, 342
— movements in human red blood cell, 322
— pumping, electrogenic, in rat myometrium, characteristics, 360
— uptake at outer surface of frog skin, direct measurement, 83
Spirostomum, control of contractility by dissociated calcium ions, 168
Squid axon, sodium efflux to external sodium and potassium, effects of intracellular adenosine-5′-diphosphate and orthophosphate on sensitivity of, 583
Stimulus-response system of *Phycomyces*, effects of cold periods on, 297
Stochastic properties of discrete waves of *Limulus* photoreceptor, 751
Synergists and antagonists of hydroosmotic response of toad urinary bladder, threshold and receptor reserve in action of neurohypophyseal peptides, 250

T

Tetraethylammonium ions, leukocidin, and membrane acyl phosphatases in relation to leukocyte potassium pump, 16
Tissue, cardiac, mammalian, kinetic studies of specific uncoupling of excitation and contraction by lanthanum in, 191
Toad urinary bladder, hydroosmotic response, synergists and antagonists of, threshold and receptor reserve in action of neurohypophyseal peptides, 250
Trout, rainbow, *Salmo gairdneri*, mechanisms of sodium ion transport by irrigated gills of, 342
Tubules, transverse, and surface membrane of skeletal muscle fibers, linear electrical properties, 640

U

Urinary bladder, toad, hydroosmotic response, synergists and antagonists of, threshold and receptor reserve in action of neurohypophyseal peptides, 250

V

Venus's flytrap, response properties of sensory hair excised from, 64
Viral disease, ocular, and interferon, 249 s
— infections, interrelationships of interferon and immunity during, 212 s
—, non-, interferon inducers, 57 s
—, non-, stimuli of microbial origin, interferon production by, 25 s
— state, anti-, development in response to interferon, 172 s
Viruses, interferon induction by, 3 s
—, interferon induction by, molecular aspects, 13 s
Virus-induced L-cell interferon, comparison of in vitro and in vivo labeling, 134 s
Visual adaptation in skate retina, 491
Voltage amplification in diffusion regime, kinetics of excitable membranes, 272

W

Water and nonelectrolyte permeability induced in thin lipid membranes by polyene antibiotics, nystatin and amphotericin B, 125
—, nonsolvent, apparent, contribution of excluded volume of bovine serum albumin for solute molecules to, 180
—, solvent, for electrolytes, in giant barnacle muscle fiber, 521
Waves, discrete, of *Limulus* photoreceptor, stochastic properties, 751

CONTENTS OF VOLUME 56

NUMBER 1, PART 1, JULY, 1970

1 Henk Spekreijse and Alan L. Norton. The dynamic characteristics of color-coded S-potentials

16 A. M. Woodin and Antonnette A. Wieneke. Leukocidin, tetraethylammonium ions, and the membrane acyl phosphatases in relation to the leukocyte potassium pump

33 René Epstein and Harry Grundfest. Desensitization of gamma aminobutyric acid (GABA) receptors in muscle fibers of the crab *Cancer borealis*

46 Maxwell Mark Mozell. Evidence for a chromatographic model of olfaction

64 R. M. Benolken and S. L. Jacobson. Response properties of a sensory hair excised from Venus's flytrap

83 Thomas U. L. Biber and Peter F. Curran. Direct measurement of uptake of sodium at the outer surface of the frog skin

100 Albert Cass, Alan Finkelstein, and Vivian Krespi. The ion permeability induced in thin lipid membranes by the polyene antibiotics nystatin and amphotericin B

125 Ronald Holz and Alan Finkelstein. The water and nonelectrolyte permeability induced in thin lipid membranes by the polyene antibiotics nystatin and amphotericin B

NUMBER 1, PART 2, JULY, 1970

Foreword Maclyn McCarty

General Introduction Jan T. Vilček

List of Participants

Interferon Induction—I

3 s Royce Z. Lockart, Jr. Interferon induction by viruses

13 s D. C. Burke. Molecular aspects of interferon induction by viruses

25 s Julius S. Youngner. Interferon production by nonviral stimuli of microbial origin

Interferon Induction—II

43 s Edward De Maeyer, Jaqueline De Maeyer-Guignard, and Pierre Jullien. Circulating interferon production in the mouse. Origin and nature of cells involved and influence of animal genotype

57 s Thomas C. Merigan, Erik De Clercq, and Gerald H. Bausek. Nonviral interferon inducers

76 s Jan Vilček. Cellular mechanisms of interferon production

Discussions

90 s A. K. Field, A. A. Tytell, G. P. Lampson, M. M. Nemes, and M. R. Hilleman. Double-stranded polynucleotides as interferon inducers

97 s John A. Armstrong. Control of interferon production in rabbit cells treated with poly I:C

99 s Philip H. Prose, Alvin Friedman-Kien, and Jan Vilček. The uptake of a labeled, double-stranded polynucleotide by cultured rabbit kidney cells: an electron microscopic study

Purification and Mechanism of Action

113 s K. H. Fantes. Interferons: purification and physicochemical aspects

134 s D. Stanček, R. R. Golgher, and K. Paucker. Comparison of in vitro and in vivo labeling of virus-induced L-cell interferon

149 s Robert M. Friedman. Studies on the mechanism of interferon action

172 s Joseph A. Sonnabend, I. M. Kerr, and E. M. Martin. The development of the antiviral state in response to interferon

Discussion

184 s Shudo Yamazaki and Robert R. Wagner

Interferon and Interferon Inducers in Disease

193 s Samuel Baron. The defensive role of the interferon system

212 s Lowell A. Glasgow. Interrelationships of interferon and immunity during viral infections

227 s René I. Jahiel. Interferon and interferon inducers in protozoal infections

238 s Hilton B. Levy, Freddie Riley, and Sam Margolis. Interferon and interferon inducers in the treatment of malignancies

Discussion

249 s Miles A. Galin and Mercedes Weissenbacher. Interferon and ocular viral disease

NUMBER 2, AUGUST, 1970

147 P. F. Duggan and A. Martonosi. Sarcoplasmic reticulum. IX. The permeability of sarcoplasmic reticulum membranes

168 Earl M. Ettienne. Control of contractility in *Spirostomum* by dissociated calcium ions

180 G. W. F. H. Borst-Pauwels and D. A. Goldstein. Contribution of the excluded volume of bovine serum albumin for solute molecules to the apparent nonsolvent water

191 W. G. Sanborn and G. A. Langer. Specific uncoupling of excitation and contraction in mammalian cardiac tissue by lanthanum. Kinetic studies

218 William L. Nastuk and Rodney L. Parsons. Factors in the inactivation of postjunctional membrane receptors of frog skeletal muscle

250 Patrick Eggena, Irving L. Schwartz, and Roderich Walter. Threshold and receptor reserve in the action of neurohypophyseal peptides. A study of synergists and antagonists of the hydroosmotic response of the toad urinary bladder

272 Franklin F. Offner. Kinetics of excitable membranes. Voltage amplification in a diffusion regime

NUMBER 3, SEPTEMBER, 1970

297 M. Petzuch and M. Delbrück. Effects of cold periods on the stimulus-response system of *Phycomyces*
309 Donald H. Lambert and Rodney L. Parsons. Influence of polyvalent cations on the activation of muscle end plate receptors
322 John R. Sachs. Sodium movements in the human red blood cell
342 Theodore H. Kerstetter, Leonard B. Kirschner, and Donald D. Rafuse. On the mechanisms of sodium ion transport by the irrigated gills of rainbow trout (*Salmo gairdneri*)
360 Grahame S. Taylor, David M. Paton, and E. E. Daniel. Characteristics of electrogenic sodium pumping in rat myometrium
376 John S. McReynolds and A. L. F. Gorman. Photoreceptor potentials of opposite polarity in the eye of the scallop, *Pecten irradians*
392 John S. McReynolds and A. L. F. Gorman. Membrane conductances and spectral sensitivities of *Pecten* photoreceptors
407 Arthur A. Manthey. Further studies of the effect of calcium on the time course of action of carbamylcholine at the neuromuscular junction

NUMBER 4, OCTOBER, 1970

421 Bruce W. Knight, Jun-Ichi Toyoda, and Frederick A. Dodge, Jr. A quantitative description of the dynamics of excitation and inhibition in the eye of *Limulus*
438 Y. Lange, R. V. Lange, and A. K. Solomon. Cellular inhomogeneity in dog red cells as revealed by sodium flux
462 Raymond A. Frizzell and Stanley G. Schultz. Effects of monovalent cations on the sodium-alanine interaction in rabbit ileum. Implication of anionic groups in sodium binding
491 John E. Dowling and Harris Ripps. Visual adaptation in the retina of the skate
521 J. A. M. Hinke. Solvent water for electrolytes in the muscle fiber of the giant barnacle

NUMBER 5, NOVEMBER, 1970

543 A. M. Brown and P. R. Berman. Mechanism of excitation of *Aplysia* neurons by carbon dioxide
559 A. M. Brown, J. L. Walker, Jr., and R. B. Sutton. Increased chloride conductance as the proximate cause of hydrogen ion concentration effects in *Aplysia* neurons
583 Paul De Weer. Effects of intracellular adenosine-5′-diphosphate and orthophosphate on the sensitivity of sodium efflux from squid axon to external sodium and potassium

621 STANLEY G. SCHULTZ, LORNA YU-TU, OSVALDO O. ALVAREZ, and PETER F. CURRAN. Dicarboxylic amino acid influx across brush border of rabbit ileum. Effects of amino acid charge on the sodium–amino acid interaction

640 MARTIN F. SCHNEIDER. Linear electrical properties of the transverse tubules and surface membrane of skeletal muscle fibers

NUMBER 6, DECEMBER, 1970

673 JEAN JACQUES HAJJAR and PETER F. CURRAN. Characteristics of the amino acid transport system in the mucosal border of rabbit ileum

692 EDWARD G. HENDERSON. Potassium exchange and afterpotentials in frog sartorius muscles treated with glycerol

716 S. WALLACH, P. J. GAMPONIA, and S. A. AHMED. The cellular transport of magnesium in rat liver

732 C. L. GIBBS and W. R. GIBSON. Energy production in cardiac isotonic contractions

751 RICHARD SREBRO and STEPHEN YEANDLE. Stochastic properties of discrete waves of the *Limulus* photoreceptor

768 AKIO SHIRAISHI and MASTARO KUWABARA. The effects of amino acids on the labellar hair chemosensory cells of the fly

783 INDEX TO VOLUME 56
